

MagEx STARlet

The MagEx STARlet is a fully automated solution for magnetic bead-based nucleic acid extraction and is ideal for isolation of pathogen RNA from Coronavirus (COVID-19). It is designed to be used with a variety of kit chemistries from leading partners, including those that are FDA or IVD approved, and can process up to 96 samples at a time.

Popular Kits Supported on this Platform

NucleoMag® Pathogen RNA and DNA Isolation Kit from Macherey-Nagel (available as CE-IVD certified kit)

MagMAX™ Viral/Pathogen NA Extraction from Thermo Fisher Scientific

Mag-BIND® Viral DNA/RNA Kit from Omega Biotek

Quick-DNA/RNA™ Viral MagBead Kit from Zymo Research

Maxwell® HT Viral TNA Kit, Custom from Promega®
